DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I, claims 1-7, 9 and 10, in Paper No. 8 is acknowledged. The traversal is on the ground(s) that "US patent law does not require the Examiner to enter non-unity objections and therefore the Examiner is requested to reconsider the non-unity objection in view of the fact that the claims, while distinctive, are sufficiently related that they would not be an undue burden upon the Examiner to examine all three sets of claims in a single application." This is not found persuasive because "the three sets of claims" are also independent inventions. Applicants have not contested the Examiner's reasons for restriction set forth in Paper No. 7. Therefore, as required by 37 CFR 1.141 two or more "independent and distinct inventions" may not be claimed in one application.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 8, 11 and 12 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 8.

Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 10/052,476

Art Unit: 1621

5. Claims 1-7, 9 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- 6. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as", "preferably" or "most preferably" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, for example, claim 1 recites the broad recitation "transition metal of groups 3, 4-10, lanthanide or actinide", and the claim also recites "titanium, zirconium or hafnium" which is the narrower statement of the range/limitation.
- 7. Claims 1-3, 5-7, 9 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The word "isolobal" is not clear what it means. Applicants have not defined said word and it does not appear in Webster's Dictionary or Hawley's Condensed Chemical Dictionary.

8. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim is in plural form, which is an improper patent practice. Claims must be in singular form.
